Eurolecturer Academy

Summer School
Question-Driven Learning in STEM
19 – 21 May 2026 | Valencia, Spain

Although student-centered learning is widely embraced, many academic teachers still face challenges in implementing active learning strategies. **Join us and:**

- **Discover** question-driven innovative teaching approaches and meet POGIL.
- **Take** the opportunity to **develop** materials for your own teaching practice.
- **Enhance** the use of collaborative learning and questioning techniques in your teaching practice.
- **Meet** peers and international expert **Prof. Mauro Mocerino** from Curtin University, Perth, Australia, who integrates question-driven learning into his teaching, moving beyond traditional lecturing.

Organized by the **ECTN Eurolecturer Academy** and hosted by the **Faculty of Chemistry, University of Valencia**, this Summer School equips lecturers and programme directors with the knowledge and skills to confidently apply active learning strategies.

Master active learning - join the 'Question-Driven Learning in STEM' Summer School!
